<http://www.laboratoriodelcittadino.org>

Curso 7- (2 Professores)

Computational thinking in practice (7 days) -

We have prepared a course for teachers interested in computer science, information and communication technologies methods in didactic, which works with students aged 10 - 15. The course will take the form of workshops during which the participants will perform mainly practical exercises.

During classes, we will deal with the development of computational thinking skills. The aim of the course is to familiarize participants with different approaches of teaching computer science and the possibilities of using IT methods and tools in school and out-of-school education.

Varsóvia – Polónia – 7/7/2019 a 13/7/2019
